SUMMARY

Software Development Engineer with 3+ years of experience building and scaling production web platforms with React, Python and Django, plus Redux, TypeScript, FastAPI and AWS. Team Lead at EventGraphia, owning the complete React platform and system architecture, and shipping face recognition, payments, referral programs and real-time dashboards. Also builds multi-agent AI systems, including an 11-agent pipeline that runs a live wedding magazine with narrated reels.

TECHNICAL SKILLS

React & Web: ReactJS, Redux, JavaScript (ES6+), TypeScript, HTML5, CSS3, Tailwind CSS, jQuery, Service Workers, Capacitor.js
Backend: Python, Django, FastAPI, REST APIs, WebSockets
Databases & Caching: MongoDB, SQLite, Firebase, Redis
AI & LLMs: Claude (Anthropic), Groq, Gemini, Ollama, LLM Integration, Multi-Agent Systems, Text-to-Speech (Kokoro)
Cloud & DevOps: AWS (S3, CloudFront, Rekognition), Docker, CI/CD, Render, n8n, ffmpeg
Integrations & Tools: Razorpay, Cashfree, PostHog, Git, GitHub, Postman, Jira

EXPERIENCE

EventGraphia — Software Development Engineer (Team Lead) Aug 2023 – Present
Gurugram, Haryana

- Owned the complete **React platform**, system architecture and end-to-end delivery.
- Migrated legacy jQuery pages to a modern ReactJS app, improving page load speed by **60%** and enhancing scalability and UX.
- Integrated AWS Rekognition face recognition, enabling guests to instantly find their photos within event albums.
- Built a **Refer & Earn** program with unique referral links, referral tracking and reward crediting, increasing referral signups by **40%**.
- Integrated Razorpay and Cashfree payment gateways with a dynamic quotation-based pricing system.
- Engineered an image download pipeline using Django batching and React Service Workers, eliminating server-side zip storage and cutting related infrastructure cost to near zero.
- Automated React build deployments to AWS S3 and CloudFront, reducing deployment time by **90%** with zero-downtime releases.
- Built media workflows including queued multi-image uploads, album autoplay, a custom video player (overlays, quality switching, speed controls) and a timestamp-based video commenting system (React + Django).
- Developed a photographers dashboard with calendar-based event tracking, async data verification and real-time updates via WebSockets (FastAPI, Django, React).
- Built a shared JavaScript component library distributed via CDN for reuse across projects, and an SEO-optimized blog platform using Django and MongoDB.
- Built a custom PostHog analytics dashboard for user behavior insights, improving feature development efficiency by **20%**.

GoMechanic — Frontend Developer Intern Sep 2022 – Dec 2022
Gurugram, Haryana

- Developed new ReactJS modules, including a cricket match prediction feature that boosted user engagement.
- Built responsive advertising templates with HTML and CSS, and tested and integrated REST APIs using Postman.

PROJECTS

Phera: AI Wedding Magazine — Live Demo · GitHub *Python, Multi-Agent LLMs, ffmpeg, TTS, SEO*

- Built an autonomous **11-agent pipeline** (crawl, select, write, plagiarism check, fact-check, SEO, images, reel, voice, music, publish) that turns wedding news into original 850–1,100 word SEO posts, running entirely on free tools and scheduled twice daily.
- Designed a human-in-the-loop admin review where approvals, 1–5 ratings and rejection reasons train the Selector agent, which also enforces a 70/30 India/Asia content mix.
- Added automated quality gates: local phrase-overlap plagiarism scoring with double-checked LLM paraphrase flags, a fact-check agent that cuts unsupported claims, and an SEO agent that scores drafts out of 100 and sends weak ones back for revision.
- Rendered 1080×1920 narrated reels with zooms, crossfades, offline TTS and auto-ducked licensed music.
- Published a static magazine site with continuous next-story loading, instant search, swipe navigation, full JSON-LD schema, sitemap and RSS; verified with an offline test that simulates 10 days of the pipeline using a mock model.

Shoppin — Live Demo *React, TypeScript, Capacitor.js, React Spring, Tailwind*

- Built a cross-platform Android/iOS shopping app from a single React codebase with Tinder-style swipe gestures (like, dislike, add to cart).

EDUCATION

Maharaja Agrasen Institute of Technology, New Delhi Jul 2020 – Jul 2024
B.Tech, Electronics and Communication Engineering | CGPA: **9.1/10**
